Shipping of Congressionals Expedited

Congressional publications have long been a top priority at the Library Programs Service (LPS). In an effort to expedite their classification, distribution, and microfiche conversion even further, LPS has devised new procedures for processing these important documents. The new procedures were implemented the week of March 8, 1993.

Under the new procedures, LPS staff prepare shipping lists consisting of paper Congressional publications exclusively. Depositories should expect to receive approximately two Congressional boxes a week. These Congressional shipments receive priority processing ahead of other shipments, so the material can reach depositories more quickly. Previously, Congressional publications were shipped in the order received, in shipping boxes that also contained titles from other agencies.

By speeding up internal processing for Congressional publications, LPS staff anticipate that microfiche conversion can also be expedited. Those depositories which select microfiche versions of Congressional publications should receive the material sooner.

Implementation of these new procedures does not affect the shipping list numbering sequence.

NESE-DB Shipment Delayed

Shipment of the February 1993 issue of the National Economic, Social, and Environmental Data Bank (NESE-DB) has been delayed. The Commerce Department's Office of Business Analysis (OBA) has informed the Library Programs Service that the delay is due to a last minute software problem which is now being corrected.

OBA will mail the February 1993 discs directly to depository libraries rather than rely on LPS shipment. LPS has provided OBA with mailing labels of those libraries selecting item 0128-N. OBA expects NESE-DB to be mailed about March 23 for receipt by the end of the month. This will be a **one-time** mailing to ensure that libraries have their copies prior to the Federal Depository Conference in April. While there will be no shipping list, LPS will continue to fill claims. The SuDocs classification number for these discs is C 1.88/2:993/1.

Please be sure to look in your regular mail for the NESE-DB mailer.

OFFICE OF THE
SUPERINTENDENT OF DOCUMENTS

March 12, 1993

Dear Depository Librarian:

The Library Programs Service has recently been apprised that the publication, Loudoun Heights, Archeological & Historical Resources Study, Occasional Report No. 8, 1992, from the Department of the Interior, National Park Service, should not have been shipped to depository libraries. Distribution of this report was restricted and should have been made available to State Historic Preservation offices only. It is "required for official use only for strictly administrative or operational purposes" under provisions of Title 44, United States Code, section 1902.

Descriptive information on this publication:

Title	SuDocs #	Shipping list #	Shipping list date	Item #
Loudoun Heights, Archeological & Historical Resources Study	I 29.14/2:8	93-0102-P	02/18/93	0646-I

I am requesting that you immediately withdraw this publication and destroy it by any means to prevent disclosure of its contents. Both LPS and the Interior Department regret any inconvenience resulting from the shipment of this "official use only" publication.

Sincerely,

A handwritten signature in cursive script that reads "Wayne P. Kelley".

WAYNE P. KELLEY
Superintendent of Documents

S.564, a Bill on Electronic Information Access, Introduced in the U.S. Senate

[Text from the Congressional Record, March 11, 1993, pp. S2781-S2782.]

By Mr. Ford (for himself and Mr. Stevens):

S. 564. A bill to establish in the Government Printing Office a means of enhancing electronic public access to a wide range of Federal electronic information; to the Committee on Rules and Administration.

Government Printing Office Electronic Information Access Enhancement Act of 1993

Mr. Ford. Mr. President, I am pleased today to introduce with the senior Senator from Alaska [Mr. Stevens] the Government Printing Office Electronic Information Access Enhancement Act of 1993. This legislation will greatly enhance free public access to Federal electronic information.

The bill requires the Superintendent of Documents at the Government Printing Office to provide an online Congressional Record and Federal Register free to depository libraries and at the incremental costs of distribution to other users. The bill allows other documents distributed by the Superintendent of Documents to be added online as practicable and permits agencies to voluntarily disseminate their electronic publications through the same system.

I believe this bill goes a long way toward ensuring that taxpayers have affordable and timely access to the Federal information which they have paid to generate.

Mr. President, I ask unanimous consent that the text of the bill be printed in the Record.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S.564

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Section 1. Short Title.

This Act may be cited as the "Government Printing Office Electronic Information Access Enhancement Act of 1993".

Sec. 2. Amendments to Title 44, United States Code.

(a) In General.-- Title 44, United States Code, is amended by adding at the end the following new chapter:

"Chapter 41--Access To Federal Electronic Information

"Sec.

"4101. Electronic directory; online access to publications; electronic storage facility.

"4102. Fees.

"4103. Biennial report.

"4104. Definition.

"§4101. Electronic directory; online access to publications; electronic storage facility.

"(a) In General.-- The Superintendent of Documents, under the direction of the Public Printer, shall--

"(1) maintain an electronic directory of Federal electronic information;

"(2) provide a system of online access to the Congressional Record, the Federal Register, and, as determined by the Superintendent of Documents, other appropriate publications distributed by the Superintendent of Documents; and

"(3) operate an electronic storage facility for Federal electronic information to which online access is made available under paragraph (2).

"(b) Departmental Requests.-- To the extent practicable, the Superintendent of Documents shall accommodate any request by the head of a department or agency to include in the system of access referred to in subsection (aX2) information that is under the control of the department or agency involved.

"(c) Consultation.-- In carrying out this section, the Superintendent of Documents shall consult--

"(1) users of the directory and the system of access provided for under subsection (a); and

"(2) other providers of similar information services.

The purpose of such consultation shall be to assess the quality and value of the directory and the system, in light of user needs.

"§4102. Fees

"(a) In General.-- The Superintendent of Documents, under the direction of the Public Printer, may charge reasonable fees for use of the directory and the system of access provided for under section 4101, except that use of the directory and the system shall be made available to depository libraries without charge. The fees received shall be treated in the same manner as moneys received from sale of documents under section 1702 of this title.

"(b) Cost Recovery.-- The fees charged under this section shall be set so as to recover the incremental cost of dissemination of the information involved, with the cost to be computed without regard to section 1708 of this title.

"§1403. Biennial report

"Not later than December 31 of each odd numbered year, the Public Printer shall submit to the Congress, with respect to the two preceding fiscal years, a report on the directory, the system of access, and the electronic storage facility referred to in section 4101(a). The report shall include a description of the functions involved, including a statement of cost savings in comparison with traditional forms of information distribution.

§4104. Definition

"As used in this chapter, the term 'Federal electronic information' means Federal public information stored electronically."

(b) Clerical Amendment.-- The table of chapters for Title 44, United States Code, is amended by adding at the end the following new item:

"41. Access to Federal Electronic Information..... 4101".

Sec. 3. Status Report.

Not later than June 30, 1994, the Public Printer shall submit to the Congress a report on the status of the directory, the system of access, and the electronic storage facility referred to in section 4101 of Title 44, United States Code, as added by section 2(a).

Sec. 4. Special Rules.

(a) Operational Deadline.-- The directory, the system of access, and the electronic storage facility referred to in section 4101 of Title 44, United States Code, as added by section 2(a), shall be operational not later than one year after the date of the enactment of this Act.

(b) First Biennial Report.-- The first report referred to in section 4103 of Title 44, United States Code, as added by section 2(a), shall be submitted not later than December 31, 1995.

Guidelines for Library Groups Requesting GPO or LPS Speakers

These guidelines, first published in Administrative Notes, v. 13, #5, 2/29/92, are intended to assist professional library groups in requesting Government Printing Office (GPO) or Library Programs Service (LPS) participation in their activities. These guidelines should also assist GPO in responding to speaking requests and ensuring that the appropriate GPO representative has been identified for the topic and audience.

1. Written invitations for Library Programs Service (LPS) speakers or questions concerning potential LPS speakers or topics should be addressed to:

Chief, Depository Services
U.S. Government Printing Office
Library Programs Service (SLLD)
Washington, DC 20401

Invitations for the Public Printer or the Superintendent of Documents should be addressed to their attention.

2. Whenever possible, written invitations to address library meetings should be received at GPO at least three months in advance of the meeting date. GPO will respond in writing to such invitations within two weeks. If GPO is able to accommodate the request, GPO will work with meeting planners to ensure that arrangements for the designated GPO representative are made as far in advance of the meeting date as possible.
3. Invitations should identify the suggested GPO speaker and/or topic, size and composition of the audience, and the time, venue, as well as type and length of the presentation.
4. Whenever possible, speaking engagements will be combined with official business travel, such as other presentations, depository inspections, etc. For this reason, the more "generic" GPO workshops will be conducted by the Library Inspectors in conjunction with inspection visits.
5. Topics should be within the scope of the Federal Depository Library Program or the operations of the Government Printing Office.
6. Priority will be given to presentations before larger audiences, or to events which may be combined with other official travel.
7. As a general rule, acceptance of travel expenses from a private organization which GPO regulates or which is substantially affected by GPO policies and actions is a violation of GPO regulations, and therefore is not allowed.

Depository Library Inspection Schedule, April 1993

Virginia: Robin Haun-Mohamed

March

Tues. 30	Martinsville	Patrick Henry Community College Library
Wed. 31	Salem	Roanoke College Library

April

Thur. 1	Hollins College . .	Hollins College Library
Fri. 2	Bridgewater	Bridgewater College Library
Mon. 5	Lexington	Virginia Military Institute
Tues. 6	Lexington	Washington & Lee U. Law Library
Wed. 7	Lexington	Washington & Lee U. Main Library
Thur. 8	Charlottesville . . .	U. of VA Library
Fri. 9	Charlottesville . . .	U. of VA Law Library

Ohio: Joe Paskoski

Tues. 6	Marietta	Marietta College Library
Wed. 7	Athens	Ohio U. Library
Thur. 8	Rio Grande	Rio Grande U. Library
Fri. 9	Portsmouth	Shawnee State U. Library
Mon. 12	Westerville	Otterbein College Library
Tues. 13	Steubenville	Franciscan U. of Steubenville Library
Wed. 14	Steubenville	Public Library of Steubenville & Jefferson City
Thur. 15	New Concord	Muskingum College Library
Fri. 16	Worthington	Worthington Public Library

Cataloging Branch Salutes Outstanding Performance

The Cataloging Branch of the Library Program Service is fortunate in the caliber of its staff, who work diligently to enhance public access to U.S. documents through announcement in the Monthly Catalog of U.S. Government Publications and inclusion of cataloging records in automated systems. Thomas A. Downing, the Branch Chief, would like to publicly recognize those catalogers who earned an Outstanding rating for their work during fiscal year 1992. The eight Outstanding catalogers are, in alphabetical order: Joan Bates, Wil Danielson, Dennis Dearnbarger, Bob Luoma, Sumati Mehta, Vi Moorhouse, Lee Morey, and Eileen Seremeth. Short profiles of each appear in this and succeeding issues of Administrative Notes.

Outstanding Catalogers: Bates and Danielson

Joan Bates obtained her library science education at Gallaudet University and Catholic University, in Washington, DC. Prior to coming to GPO in December 1982, she worked at the Law Library of the Office of the Judge Advocate General of the Navy; Naval Supply Systems Command, Security Assistance Program; Office of Personnel Management, Staffing Services; and at the U.S. Dept. of Health, Education, and Welfare Library.

Her specialty in the Cataloging Branch of GPO's Library Division is descriptive cataloging of monographs, particularly Congressional publications and microfiche from all agencies. For much of her GPO career she has also served on a rotating basis with other staff as a liaison with the Library of Congress Subject Cataloging Division, researching and establishing new subject and geographic headings. She has also assisted in verifying LC subject headings used in the Monthly Catalog subject indexes. She has put her expertise in both descriptive and subject cataloging to good use in training other catalogers.

Wil Danielson holds a BA in history from Bethany College in Lindsborg, Kansas, a BA in philosophy from the University of Kansas, an MA in history and an MLS from Emporia State University. He worked as Assistant Documents Librarian at Northwestern University Library before coming to GPO as a cataloger in 1982.

His specialties at GPO are descriptive and subject cataloging of monographs, primarily Congressional publications. He has also served as liaison with the Library of Congress Subject Cataloging Division, researching and establishing new headings, as well as verifying LC subject headings used in the Monthly Catalog. His facility in descriptive and subject cataloging, as well as his expertise in using automated systems, have been put to good use in training many new GPO cataloging staff.

U.S. Senate Bibliographies Available from North Carolina State University

Introduction

(readme.txt9302)

The United States Senate produces series of Committee hearings, prints, and publications as part of the legislative process. These materials comprise an important segment of the holdings of more than 1400 depository libraries located throughout the nation. Bibliographic records for the individual titles in these series are contained in readily available sources. But a comprehensive listing of this material is not available to libraries.

Such lists can be of great value to depositories. The North Carolina State University (NCSU) Libraries compiles data about these series in dBase 3+ files as insurance that all of the pieces are properly received and preserved. The Documents department at NCSU contains dBase files for the 99th through 103d Congresses.

NCSU produces monthly bibliographies of Senate hearings, prints, and publications from title page proofs received weekly from the Senate Library. These bibliographies are distributed through various means:

- via anonymous FTP from FTP.NCSU.EDU
- by floppy disk distribution to subscribers
- in paper copy to subscribers and requestors

See below for instructions for FTP access to the files.

Send inquiries concerning floppy disk or paper copies to:

John A. McGeachy
Documents Department
D.H. Hill Library
North Carolina State University
Raleigh, NC 27695-7111

Internet: Jack_McGeachy@ncsu.edu
Telephone: (919) 515-3280

FTP Archive Access

The FTP archive computer is a UNIX one so commands are case sensitive in most situations.

Getting the Text of a Bibliography

ACSII text files of the Senate bibliographies reside in an FTP archive,

```
machine name  =  FTP.NCSU.EDU
username      =  anonymous
password      =  userid@node
```

in the subdirectory /senate

```
cd pub/docs/senate
```

Use a "get" command to retrieve any file desired:

```
get filename.filetype
```

You can direct the file you want to "get" into any subdirectory on your computer by issuing this change local directory command before you "get" the file:

```
lcd [path]
```

Getting a List of Archived Texts

Use a "ls" (list) command to display the list of SENATE files.

```
ls
ls -a      These two commands display the list with
ls -al     additional information.
ls 100*    Displays the list of 100th Congress entries.
```

One of the files in the SENATE subdirectory is an ASCII text list of the files. You may also "get" this file, FILELIST.TXTyrmo. It is this file that is sent automatically to interested parties. (See the section below.)

Learning of and Obtaining Updated Bibliographies

Bibliographic files for series of the current Congress, and the Congress just prior to the present one, will be replaced each month as new titles are added to the databases. The owner of the SENATE files maintains a list of email addresses of individuals desiring to learn when new files become available.

Send an email request to Jack_McGeachy@ncsu.edu asking that your name be added to the list of recipients of the monthly SENATE list of files.

Each month thereafter you will receive a message listing all the files available in the SENATE directory. Examine the date portion of the filetype to see which of the files have been updated in the present month.

U.S. Senate Bibliographies

(filename.txt9302)

File Nomenclature

File Name

The first three characters of a file name designate the number of a Congress:

099 100 101 102 etc.

The next two characters in a file name identify the type of Senate document contained in the file:

HR - Hearing PB - Publication PT - Print

The last character of the file name identifies the type of record sequence in the file:

C - Alphabetical by Committee, and then numerical within each Committee
 N - Numerical by HR, PB, or PT number
 T - Alphabetical by title

There are nine files per Congress, e.g.:

099HRC	099PBC	099PTC
099HRN	099PBN	099PTN
099HRT	099PBT	099PTT

File Type

The first three characters of the file type identify the text source. The final four characters of the file type designate the year and month in which the file was created; e.g. xxx9107.

.TXT - ACSII text produced by the dBase report generator. Each ACSII.TXT file in the FTP archive is replaced with a new updated, cumulated file every month in which new records are added to the corresponding dBase files. .TXT files are used at NCSU as source code for editing in WordPerfect.

These .TXT files will only be slightly edited before appearing in the archive.

.DBF - Database files are not available through FTP. Those persons wishing to receive dBase 3+ files may request them from NCSU. Three files will be sent per Congress: two .DBF files (one in numerical order, another in title order), and an .NDX (index) file to access the data in Committee order.

.GWP - ASCII text files created from edited Word Perfect files. .GWP files will be found as the final edition of a List of Senate hearings, prints, and publications for a Congress. .GWP files are sent to floppy disk subscribers of the listings by Committee.

An example of a typical file designation is thus: 102HRC.TXT9110

For the best presentation of the data obtained from the FTP archive, reformat .GWP or .TXT files with a word processor using 10 point Courier font and one inch left and right margins.
